

CAILLOU FINDS A CATERPILLAR

Caillou is discovering the world around him! In this book, Caillou and your child can learn valuable lessons to better understand the world around them.

Book text: Pamela R. Jarrell

Illustrations: Ellen N. Storch

Ages: Toddler

Pages: 10

Themes: Nature; memory skills; technology

Curiosity is the fuel that keeps our kids going! Our children learn more in the first few years of their lives than at any other time. In this book Caillou and his friend Clementine learn about how a caterpillar grows up to be something wonderful...just like a child grows into an adult. Make that comparison with your child. With the help of Caillou's dad, the children are able to learn some interesting facts about the caterpillar. Our children are growing up in a world of fast moving technology so let them know that a computer can be a real source of information. If you don't have a computer at home, look at one at your local library.

On the back of this book there are a few follow-up questions that you can talk with your child about. Helping them to remember things you read about is a great way to help your child develop memory skills. You can never start too soon!

A cute way to make a picture with A caterpillar...Use 1/8-inch-wide strips of paper to make caterpillar shapes on a piece of paper with the help of glue and a toothpick to wind the paper around.
